I was traveling and ran into heavy traffic in another state and was at a stand still. I have XM Radio and tuned into that states traffic & weather channel and found out that there was a major accident and traffic was delayed for hours. Its saved me valuable time so I was able to make my appointment. Thank you XM for providing me such a time saving (and now a days, gas savings) in travel delays. This service is very important to all that it can help.
